SUMMARY

Junior Computer Science student at UMT focused on Software Engineering and Applied AI. Experienced in building production-ready full-stack web platforms with Next.js, TypeScript, and Supabase / PostgreSQL (40+ tables, RLS), and developing algorithmic AI models with Python / TensorFlow. Proven track record managing 600+ domain lifecycles, configuring DNS, Cloudflare, SSL/TLS, and operating real-world database systems.

TECHNICAL SKILLS

AI & Applied ML	Python, TensorFlow/Keras, Artificial Neural Networks (ANN), A* Algorithm, BFS, Heuristic Search, Synthetic Dataset Generation, Model Evaluation, Cross-Validation
Full-stack Web	Next.js (App Router), React, TypeScript, JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, shadcn/ui, Server Actions, TanStack Query, Zod Validation
Databases & Backend	Supabase, PostgreSQL (40+ tables), Auth, Realtime, Storage, Row Level Security (RLS), Stored Procedures / RPC, Schema Architecture, Google Sheets API
DevOps & Infra	Git/GitHub, Vercel, Cloudflare (DNS, SSL, WAF), 600+ Domains Management, Nameserver & MX Records, Hosting/VPS, SSL/TLS Security
Work Ethic & Lang	Professional English Technical Documentation, Fast Learner, Autonomous Execution, Team Collaboration, High Ownership

FEATURED PROJECTS

AI ANN Maze Pathfinding – Heuristic Search	06/2026
Independent Research Project	GitHub
- Engineered an Artificial Neural Network (ANN) using Python/TensorFlow to learn heuristic functions for A* search in complex mazes. - Generated synthetic dataset via BFS, extracted 10-dimensional feature vectors; benchmarked BFS vs. A* Manhattan vs. A* ANN. - Maintained optimal shortest path (20 steps) while reducing explored nodes from 104 (BFS) and 46 (Manhattan) down to 33 (ANN) — a 68% search cost reduction; MAE $\approx$ 2.28 steps.	
Joblink – Professional Social Network & Job Portal	05/2026 – Present
Team 18NĐ / Full-stack Developer	GitHub Live
- Developed comprehensive recruitment and professional social platform with Next.js 16, React 19, TypeScript, Tailwind CSS, shadcn/ui, and Supabase. - Built social feed, company profiles, vacancy postings, job application tracking, real-time messaging/notifications, and admin dashboard. - Architected Server Actions → Repository → Supabase client, PostgreSQL schema with 40+ tables, RLS/RPC security, triggers, pg_trgm search, and i18n localization.	
MemoLab.io – Knowledge Management & Learning Platform	2026
Web Platform Developer	memolab.io
- Contributed to building and maintaining the public web platform for Memo Lab, a digital product enabling individuals and teams to structure academic materials and knowledge bases. - Architected multi-tier content taxonomy across courses, publications, and topics with secure authentication and automated RSS feeds.	
SUI Shopping Cart Platform	01/2026
Team Lead / SUI Hackathon MVP	GitHub
- Led team to build decentralized e-commerce marketplace MVP in 48 hours at SUI Hackathon, supporting physical and digital goods with seller and admin dashboards. - Developed Next.js frontend, Supabase metadata storage, and Sui Move smart contracts executing atomic checkouts and transparent asset transfer.	

- Engineered campus event operations platform with TypeScript, structured with modular client, server, and shared types for maintainability.
- Implemented sub-second QR code attendance check-in, real-time attendance ledger, and deployed to Vercel.

Additional Projects

LibUMT [\[GitHub\]](#) [\[Live\]](#)

12/2025 – Present

Article review portal using Google Sheets API as serverless backend on Vercel with AI Agent workflow.

High School Exam 2025 Score Lookup [\[GitHub\]](#) [\[Live\]](#)

07/2025

High-concurrency score lookup portal with Cloudflare CDN caching and sub-200ms query latency.

UMT Academic Assistant Chatbot [\[GitHub\]](#)

07/2025

Python-based conversational assistant for academic regulations and student handbook inquiries.

PROFESSIONAL EXPERIENCE

UMT Library & Information Center

09/2024 – Present

Data & Operations Collaborator

Ho Chi Minh City, Vietnam

- Operated circulation workflows, academic resource retrieval, and batch textbook distribution per semester across the student body.
- Standardized bibliographic and student records in centralized library software; collaborated with communications team on media assets and research guides.

Domain Reseller Tenten.vn

2023 – 2025

Domain Reseller & Infrastructure Technician

Remote

- Consulted, registered, renewed, transferred, and configured global (.com, .net) and national (.vn) domains for individual and SME clients.
- Configured DNS, Nameservers, MX records, Email Routing, Cloudflare WAF, and SSL/TLS; managed full lifecycle of 600+ domain portfolios.

Nhon Trach High School Confessions Portal

2022 – Present

System & Community Webmaster

Dong Nai, Vietnam

- Operated and maintained technical infrastructure for nhontrachcfs.edu.vn and community fanpage with ≈3,000 active followers.
- Moderated user submissions to ensure privacy, cybersecurity, and community safety; resolved operational issues with rapid turnaround.

EDUCATION

University of Management and Technology (UMT)

2024 – 2028

Bachelor of Science in Information Technology (Junior Year)

Ho Chi Minh City, Vietnam

HONORS & CERTIFICATIONS

- 11/09/2026: **The Global Citizen Fellowship 2026 Program** — AIT Extension, Asian Institute of Technology (Thailand). Verification Ref. No. 22400.
- 14/07/2025: **ICPC UMT 2025 Competitive Programming Contest** — Certificate of completion, collegiate round.
- 11/04/2025: **Access to Academic Database Resources Program** — RMIT University Vietnam & UMT.
- 11/11/2024: **STINET Professional Certificate** — Science & Technology Information Network of HCMC.
- 2019: **District Merit Award in Informatics** — Bureau of Education & Training, Nhon Trach District.
